hello,
I hope you are doing well. I have two questions. 1st one is I want to generate the province level variable from the DHS Pakistan2017-18 including GB & A,J&K. I am unable to construct it. can you guide me how i can generate it including Gilgit Baltistan and Azad Jammu & Kashmir. I am using the v024, it is appropriate variable for province or not. kindly guide me. 2nd one is it is necessary to assign the weights in regression like simple logistics regression, like we assign the weights to any variable [iweight=wgt]. I am using STATA 15 for analysis. i am waiting for your positive response. Thank you so much.

Regards,
Rubab Saleem
