Dear all,

I am trying to do an analysis related to this on ALBANIA, and desperately need your help. On pg 140 of the Albania DHS final report, it is stated that 0.2% of children received no vaccinations.

However, when I use the code provided on GitHub (which I am extremely grateful for) the result is 6.47%. I have been trying to do this for days but I am stuck on this variable.

Ultimately, I would like to know the percentage distribution of fully and non-immunized children which is the outcome variable of my study.

Please help in any way you can,

Best regards
