Dear,

Thanks for your reply.

The reason why I use KR instead of PR is, I need children below five years old and their mother only.

Can you please tell me the total number of female population base where the 2019 Ethiopian DHS IR file was sampled?

It will help me to create the correct weight: As I am intending to combine DHS 2000, 2005, 2011, 2016, and 2019 in my analysis.

Kind regards

Zecharias
