Dear Shireen,

Following up the previous question, I have this specific request:

3) Subsequent with the DHS guideline at

https://www.dhsprogram.com/Data/Guide-to-DHS-Statistics/index.htm#t=Nutritional_Status.htm%23Percentage_of_women_bybc-2&rtocid=_14_9_1 in

chapter 11: I am not able to retrieve the v445 in the IR file to construct Percentage of women by nutritional status. The variable (column) v445 is all NA and it's supposed to take the Body Mass Index (BMI) values of the women under the survey. Do you have any reflection on it?

Thanks much

Elsa
