Hello Shireen,

Thank you so much. I have tried the code and I got the same figures as well.

Now I am trying to clean up the dataset to exclude those that were pregnant and with less than 2 month old birth from my analysis but I am getting 14,867 instead of 12,728.

I used the following code to drop the cases:

```
//excluding pregnant women and less than 2 months since last birth  
drop if (v213==1 | age<2)
```

```
summarize bmi
```

```
//Dropping outliers  
drop if bmi<12.00  
drop if bmi>60.00
```

```
summarize v438  
drop if v438<1300  
drop if v438>2200
```

Please assist me.

Thank you.

Kind regards

Chinwe Uzokwe
