Good afternoon

My project looks at ever and recent testing for HIV among women (usually v781 and v826 respectively). However, I'm at a loss when it comes to MW2010DHS. v826 is not collected and its replaced s1312 but I cannot understand what is the denominator/skip pattern for s1312? Also what is the difference between s1311 (ever testing) and v781 - it seems they do not match.. In summary, I would like to understand what is the group of eligible women who were asked recent HIV testing question.

Thank you in advance

Salome
