Hello,

Please post your question and we will try to answer it as soon as we can. Please be clear on what table you are not matching and the data file you are using.

Note that some indicators are country specific and you will need to read the footnote in the tables to adjust the standard code. For instance for ANC, skilled provider differs from country to country. Be sure to check if this is the reason you are not matching the report.

Best,
Shireen Assaf
The DHS Program
