Subject: Matching Variables from IDIR and IDOD for 2002, 2007, 2012, 2017
Posted by gprajitno on Thu, 16 Dec 2021 06:37:37 GMT

Hi,

How do you match the data from IDIR and IDOD for 2002, 2007, 2012, 2017 datasets? I am trying to locate which individual in IDOD is which in the IDIR to get the "first menstruation age" data (e.g ay205 in IDOD6CDT, 2012) but I can't seem to find the instructions to how to match these datasets.
Thank you.

Regards,
Greselva
