Subject: missing observations

Dear

My name is Theresa Vanwingh. I am a master's student in economics.

I am currently writing my master's thesis on the determinants of the female labor force participation rate in Turkey.

Some time ago I requested 2013 and 2018 DHS data on your website and I have received access.

Now, however, I see some variables of vital interest to have zero observations, such as:

This in contrast to the reports on these data, describing in great detail the distribution of women over occupations.

This is quite a set back for my further research.

I was therefore wondering if there is a way to get access to these data?

Thank you very much in advance!

Kind regards

Theresa Vanwingh
