Following is response from DHS Research & Data Analysis Director, Tom Pullum:

To construct the weights for multi-level analysis with the NFHS-4 data, you need information that is not easily available. We have a special GitHub location for this:

[https://github.com/DHSProgram/DHS-Analysis-Code/tree/main/Multilevel\\_Weights](https://github.com/DHSProgram/DHS-Analysis-Code/tree/main/Multilevel_Weights). You will see a folder for India. Please check that. If you still have questions, please let us know.
