Yes, here are a couple of calls to the API that will return the source by method. There are a lot of separate indicators for the source, so the list gets long and browsers don't like calls of over 250 characters, so I have split the calls into a couple of different calls:

For public sources:
https://api.dhsprogram.com/rest/dhs/data/FP_SRCM_W_PUB,FP_SRCM_W_GHS,FP_SRCM_W_GHC,FP_SRCM_W_GFP,FP_SRCM_W_GMB,FP_SRCM_W_GFW,FP_SRCM_W_GOT?f=html&breakdown=all
and for private and other sources:
https://api.dhsprogram.com/rest/dhs/data/FP_SRCM_W_PRV,FP_SRCM_W_PHS,FP_SRCM_W_PPH,FP_SRCM_W_PDR,FP_SRCM_W_PMB,FP_SRCM_W_PFW,FP_SRCM_W_POT,FP_SRCM_W_OSR,FP_SRCM_W_SHP,FP_SRCM_W_CHH,FP_SRCM_W_FRR,FP_SRCM_W_OTH?f=html&breakdown=all

The breakdown=all parameter for these indicators breaks the data down by method.
