Hi everyone,

I am new to the DHS data analysis and I wanted to use "HC 72 (Weight/Height standard deviation (new WHO))" from DHS Sierra Leone 2019.

Could anyone please help me understand why we have HC72_1 up to HC 72_7?
The screenshot is attached for that.

What are the differences and which one do you recommend using for the analysis?

Thank you so much for your help!

Mari
