Hi,

Does anyone know if API can generate MCH indicators by background characteristics? I have specified background= all, but the code below only gives me totals for births in the past 2,3 or 5 years. Below is a frequency of the byvariableid. Thanks for your help.

```
import delimited using ///
" http://api.dhsprogram.com/rest/dhs/data?surveyYearStart=2006
&surveyYearEnd=2010&breakdown=all&indicatorIds=M
