I appreciate if you could answer my following 3 questions;

1. Which variable is for the districts (not provinces) in HR and PR files?
2. Which variable is for maternal BMI for HR and PR files?
3. Which variable is for maternal education for HR and PR files? If it is HA 66, what are the differences among HA 66_1, HA 66_2, HA_66_3, etc?

Thank you.

Best,

Mari
