Following is response from DHS Research & Data Analysis Director, Tom Pullum:

If you open the AF file for women (the IR file) and then enter the following lines, you will get .1207.

This is a proportion. Multiply it by 100 and then round to the nearest tenth of a percent and you get 12.1, which is the desired number.

```
gen teenmom=0 if v013==1
```

```
replace teenmom=1 if (v201>=1 | v213==1) & v013==1
```

```
svyset [pw=v005], psu(v021) strata(v023) singleunit(centered)
```

```
gen awfact = awfact/100
```

```
svy: ratio teenmom/awfact
```
