Subject: district level codes NFHS-4 & NFHS-5

I would like to generate district level aggregates which I would like to compare across the two waves. In turn, I need a mapping of the NFHS-5 district codes into the NFHS-4 district codes. As new district have been generated (most of the time by splitting a single existing one), a direct mapping of the new districts (appearing in 2019) to old ones (appearing in 2015) appears possible. Any help on creating such mapping of districts codes would be helpful!
