Dear Adis,

The required code you need is found here:
https://github.com/DHSProgram/DHS-Indicators-Stata/tree/mast er/Chap10_CH

Please first open the main do file to compute the age variable then you can run the CH_VAC.do
file . The indicator you are looking for is ch_novac_either

tab ch_novac_either [iw=v005/1000000]

This will match the final report with 19.2%.

Thank you.

Best,
Shireen Assaf
The DHS Program
