Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

The maternal mortality rates and ratios are much more complicated. We have posted the code on our GitHub site [https:// github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap1_6_AM](https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap1_6_AM). The generic chapter number for adult and mm is #16. Also, the standard interval for these rates is the 84 months before the month of interview, not 60 months.
