Subject: qwfwlth has no observations
Posted by Sampson on Mon, 11 Jul 2022 11:20:15 GMT

I am performing analysis on the GMHS 2017 dataset downloaded from the DHS. Unfortunately, I cannot find observations for certain variables, such as the wealth index or financial status of women in the reproductive age in stata. There is also no variable for employment or occupation status in the dataset either. This makes analysis by socioeconomic characteristics quite vague.
