Dear Sir/Madam,

I am not getting reported figures of "Table 10.12 Prevalence of anaemia in children" from the NFHS-5 raw data.

I used condition (SPSS) for the base number is:
sel if (hv103=1 and hc1>=6 and hc1<=59 and hc55=0) .

Variable used for Anaemia status:

recode hc57 (3=1) (2=2) (1=3) (4=4) (8=8) (9=9) (missing=9) into anamia.
var lab anamia 'Anaemia status'.
val lab anamia 1 'Mild' 2 'Moderate' 3 'Sever' 4 'Not anemic' 9 'Missing'.

Is there are any error in the syntax? Please suggest, how to get reported figures.

Regards,

Kailash
