Hello,

I just wanted to report an error in the variable sb18d (first diastolic reading). It has a unique value (108) for all individuals. The tabulation looks like this:

| first diastolic reading | Freq. | Percent | Cum. |
|------------------------------|---------|---------|--------|
| -----+----- 108 | 724,115 | 100.00 | 100.00 |
| -----+----- Total | 724,115 | 100.00 | |

Best
