Hello,

I just wanted to report an error in the variable sb18d (first diastolic reading). It has a unique value (108) for all individuals. The tabulation looks like this:

first diastolic reading	Freq.	Percent	Cum.
-----+----- 108	724,115	100.00	100.00
-----+----- Total	724,115	100.00	

Best
