Hi Everyone, I am carrying out analysis of the calendar data for the 2011 and 2016 dataset and I am interested in the reasons of method discontinuation of each method. However, after creating the methods and reasons string variables I realised that codes do not match those in the tool. For example the contraceptive method list of codes I can see "123456789BCLMNPTW" in the data (2011) whereas the tool has "123456789JKLMXY".

Your help is welcome.

Thanks

Hassard
