In the codebook, the N for the DV module reads as 72,056. However, the N in the data is 72,320. Has anyone identified the reason for this discrepancy?

There are also 420,149 women who were selected and not interviewed. This category is sizably larger compared to the 2015-2016 surveyed. There is no detail on this group. Who is included within this category>
