Hello,

To execute any code from the DHS Program GitHub, please check the main file and change to your paths and the survey you are working with in the main file. This is indicate in the readme file for the repository and also there are notes in the main files.

After you change the paths to your own and the survey name in the main file, you should run the main file not the separate do files.

Thank you.

Best,  
Shireen Assaf  
The DHS Program
