Dear Janet,

Thank you so much for the quick response. However, this reason does not solve my question completely. I have looked at the kids who have a missing in the variable "c_vac_card" and who are born in 2016 - they are all under 60 months at the time of the interview. In fact, only 25 out of 1556 kids born in 2016 under age of 60 months answered the question and have a nonmissing value for this variable.

Do you know why is that? Thank you so much!! :)

Best,
Cheryl
