Hello,

I cannot figure out how to create a variable for "ever used modern contraceptive method" in the KDHS 2014 dataset using KEIR72FL.dta. v302a only describes ever using any method, not type. The frequencies for v304a_01-_20 are 100% either "modern method" (01-11) or "folkloric method" (12-20).

Message 3395 does not discuss this.
