Subject: Nepal: information on hill, terai and mountain

I couldn't find information or variables on the geo-ecological region of Nepal i.e., hill, terai, mountain for SPA 2021. Where can I locate these findings? As these are available for SPA 2015, I am sure they must be there somewhere. I also tried with GIS but had no luck and I couldn't find an online layer for intersections as well. Please help me. Thanks
