Following is a response from DHS staff member, Tom Pullum:

Here's how I just found these variables with Stata, in two steps. Step 1: enter "lookfor veg". Stata then listed four variables, and it was clear that v414j was the relevant one. Step 2: enter "describe v414*". Stata then listed all the relevant variables for types of foods. Usually, you can quickly locate variables with a combination of "lookfor" and "describe".
