I want to replicate the Table 10.10 Minimum acceptable diet Percentage of youngest children age 6-23 months living with their mother who are fed a minimum acceptable diet based on breastfeeding status, number of food groups, and times they were fed during the day or night preceding the interview, according to background characteristics, India, 2019-21. All things like MAD, MDD and MMF. I have tried with the Github code but unable to get the exact values. Please help me with the syntax.
