The data file that I used was IAIR74FL.DTA. The 52 one is NFHS-3.

If I run Tom's code on IAIR74FL.DTA I get:

```
. tab1 d1 d2 d3 d4
```

-> tabulation of d1

d1	Freq.	Percent	Cum.
-----+			
-3	1	0.00	0.00
-2	4	0.00	0.00
-1	7	0.00	0.00
0	699,600	99.99	99.99
1	66	0.01	100.00
2	5	0.00	100.00
3	2	0.00	100.00
4	1	0.00	100.00
-----+			
Total	699,686	100.00	

-> tabulation of d2

d2	Freq.	Percent	Cum.
-----+			
-4	1	0.00	0.00
-2	1	0.00	0.00
-1	10	0.00	0.00
0	699,601	99.99	99.99
1	67	0.01	100.00
2	6	0.00	100.00
-----+			
Total	699,686	100.00	

-> tabulation of d3

d3	Freq.	Percent	Cum.
-----+			
-4	1	0.00	0.00
-3	2	0.00	0.00
-2	5	0.00	0.00
-1	66	0.01	0.01
0	699,599	99.99	100.00
1	8	0.00	100.00

2	4	0.00	100.00
3	1	0.00	100.00

Total	699,686	100.00	
-------	---------	--------	--

-> tabulation of d4

d4	Freq.	Percent	Cum.
----	-------	---------	------

-2	6	0.00	0.00
-1	66	0.01	0.01
0	699,603	99.99	100.00
1	9	0.00	100.00
2	1	0.00	100.00
4	1	0.00	100.00

Total	699,686	100.00	
-------	---------	--------	--
