Subject: Which wealth index to use for state specific studies Posted by sujata on Tue, 24 Jan 2023 05:55:56 GMT View Forum Message <> Reply to Message

I am working on a state-specific analysis but not sure which wealth index to use. There is hv270 (wealth index combined) and sv270s (wealth index within state). there are other wealth indices as well for urban and rural areas. In what context these different wealth indices would be used and how much the results would differ?
