Following is a response from DHS staff member, Tom Pullum:

I have checked BJIR71FL.dta, and agree with you that n=15928. The mean number of injections and the percentage of women who received an injection (in the last 12 months) in the data file agree with the numbers coming from STATcompiler. However, in STATcompiler I don't see how to get the denominator for this indicator. How do you get the denominator 7712?
