Following is a response from DHS staff member, Tom Pullum:

Does "PH model" refer to the Philippines surveys, or does it mean something else?

The interval from first union or marriage to first (live) birth is given in months by v221, as you say. It can be negative, unlike all subsequent birth intervals. If it is negative, the code is 996. What else do you need? What do you mean by "event as first live birth"?
