I'm looking for qualitative studies the DHS has conducted/commissioned on assessing the validity of DHS questions around maternal and newborn health (specifically place of delivery, skilled birth attendance, postnatal care for the baby, and breastfeeding initiation).

I've found this one: Women's recall of delivery and neonatal care in Bangladesh and Malawi: A study of terms, concepts, and survey questions by Yoder et al (2010).

<https://dhsprogram.com/pubs/pdf/QRS17/QRS17.pdf>

I'm looking for any additional and/or newer work.
