
Subject: Educational Attainment in NFHS 5

Hi,

I noticed that there are no observations for the "completed primary" category of the v149 educational attainment variable in NFHS 5's individual recode file. However, about 6% of the respondents in NFHS 4 fell into this category. How should I ensure that the educational attainment in the two datasets (NFHS 4 and 5) is aligned? Are these now recoded as "incomplete secondary"?

Thanks in advance for the help! :)
