Hi

I am wondering if the KR file include only one child of each household, why when i checked the caseid and bidx i found there are two childern from the same mother.

should i exclude the other child from the same houshold.?

the reason for my concern because this women who is unemplooyed if she is enterd the survey twise the number of unemployed mothers will increase, and this will not shows the real situation of the rate of unemployed women in the country.

I'm studing the impact of maternal employment on child health, Egypt.
