Thank you so much for your feedback Janet. Yes, kindly help me with the Stata code to construct a variable. Additionally, in the reports and in my research proposal, I have defined stillbirths as fetal deaths in pregnancies of 7 months or more. Should I stick to that definition or I go by your suggestion of 6+ months?

I will also be grateful if could provide me with stata code to calculate the number of women aged 15-49 who were pregnant in the 5 years preceding the survey focusing on those with pregnancies of 7+ months duration. Excluding those that were pregnant during the survey. This help to define my sample size.
