Hi!

I am still unable to get the DANE municipality codes for DHS 1995 or 2000 using the instructions provided (using shmunicip and shdepto). I understand this is an old thread, but any idea if it is possible to get these from these DHS rounds for Colombia? For both 1995 and 2000, the shmunicip variable takes on values from 1 to 61- which, after concatenating with the department will not yield the desired DANE municipality codes.

I would hugely appreciate the help!

Thanks and regards,  
Manhar
