Following is a response from Senior DHS staff member, Tom Pullum:

We (the DHS staff) do not use SPSS. You can find many posts on the forum that describe how to append and how to adjust the weights in pooled data using Stata. The commands would be different in SPSS but the concepts are the same.

I just went to google and entered "how to append files in SPSS". The command came up immediately. You should be able to find tutorials on how to use weights in SPSS. Sorry that we cannot be more specific. Perhaps other SPSS users can add something.
