Thanks for sharing the above codes.

I tried these codes but values don't match the reports though N=157552 matches, the mean OOPE through this codes are:

Public facility=3047.98

Private facility =24672.19

Any facility=9489.873

N= 157552

There was mention of typos and difficulty in matching the reports values. What is the possible way out. I need to match values for my study to proceed further in my study. I tried this codes in similar way for NFHS4 dataset as well. There also the values don't match. Looking forward for kind response as to how it can be obtained. Thanks you.
