Hi, I am doing this exercise for 20 different countries so wanted to know what's the best way to recognize the strategy for isolating and understanding which columns of whhid are assigned to hv001 and hv002. The example we can take is Burkina Faso 1998 survey. The full list of countries is Benin, Burkina Faso, Colombia, Ethiopia, Ghana, Guatemala, Haiti, Indonesia, Jordan, Malawi, Mali, Mauritania, Nigeria, Philippines, Rwanda, South Africa, Tanzania, Uganda and Zambia
