Following is a response from Senior DHS staff member, Tom Pullum:

Sorry--I don't know what you are looking for. In the IR file you have the education variables for the woman and her reports of the education of her current husband. If v503 (number of unions) is 1, which it is for 98% of women in this survey, then the husband is the father of all the children. If you go to the CR file, you will find the woman's husband and get his reports of his own education, which could be more accurate but only marginally. That's all the advice I can give you.
