Subject: Re: Weighting Total Pregnancies Data - Stillbirth value is reducing Posted by Janet-DHS on Fri, 05 May 2023 18:29:15 GMT View Forum Message <> Reply to Message

Following is a response from DHS staff member, Tom Pullum:

As you know, weighted and unweighted subtotals are usually different. But the difference between 119 and 200 is probably too large to be explained that way.

A pregnancy of 7+ months is a B or T preceded by 6 or more months of P. Could it be that you are using a 7 rather than a 6 for the preceding number of Ps? I cannot go through your SPSS code but that's my suspicion.
