Respected Sir/ Madam,

I, Dr. Vivek Verma, am a faculty in Dept. of Statistics, Assam Univ., Assam, India. For one of my research works, I am using the DHS data (NFHS-4) of India women (IAKR71FL)-2015-16, where the variable M1 denoting "Number of tetanus injections before birth" is ranging from -11 to 11 (attached image). Could you please explain the meaning of negative Number of tetanus injections before birth.

This will of great help for me.

Thanks and Regards,  
Dr. Vivek Verma
