Hi!

I need the indicator "Births in the last year, by age group and parity" for the calculations of PPR.

Since i calculated women and parity from BR file as below for PDHS 2018.

```
table v201 v013 [pweight = v005/1000000], contents(sum bord)
```

Kindly guide how can i get births in last year by age group and parity of a women?

Regards

Waqas Imran
