

Hi,

I am trying to merge the IR and HR files for Bangladesh, and getting a very small number of matched observations. In comparison, merging IR with PR retains all observations, which is confusing me.

So, could you check the codes and please let me know if this is the right way to do the matching?

1. IR & HR merge

```
. use "/Users/ghose/Downloads/BDHR7RDT/BDHR7RFL.DTA"  
  
. rename (hv001 hv002 hvidx_01) (v001 v002 v003)  
. sort v001 v002 v003  
  
. merge m:1 v001 v002 v003 using "/Users/ghose/Downloads/BDIR7RDT/BDIR7RFL.DTA"
```

Result	# of obs.

not matched	35,510
from master	17,420 (_merge==1)
from using	18,090 (_merge==2)
matched	2,037 (_merge==3)

2. IR & PR merge

```
. rename (hv001 hv002 hvidx) (v001 v002 v003)  
. sort v001 v002 v003  
. merge m:1 v001 v002 v003 using "/Users/ghose/Downloads/BDIR7RDT/BDIR7RFL.DTA"
```

Result	# of obs.

not matched	69,692
from master	69,692 (_merge==1)
from using	0 (_merge==2)
matched	20,127 (_merge==3)

Thanks in advance!
