Dear Trevor,

Thank you for the explanation. However, first, it is now more difficult because I thought V212 is the age (years) of the mother at FIRST birth. This is indicated in the variable description as "Age of respondent at 1st birth"; values include, for example 9, 10, 11, ..., 41. Certainly, these can not be age in years and months, unless I am mistaken. Second, does your explanation mean BIDX\$01 refers to the first birth?

Method (Tanzania)
