Following is a response from DHS staff member, Tom Pullum:

Did you get this Stata code from the DHS website, for chapter 10 (https://github.com/DHSProgram/DHS-Indicators-Stata/blob/master/Chap10_CH/CH_VAC.do)? It looks similar but I don't have time to review it in detail. If you use the GitHub code for just part of a chapter, you have to be careful. There is usually some setup for the entire chapter that needs to be run first. Can you try running the entire code for chapter 10? That may produce the correct results. Please let us know if that works.
