Dear Janet,

Thank you very much for your reply, which is 100% helpful to me.

There are still two questions that I hope can be answered.

First, why are all the HML32 in GMPR81SV data lost, but I saw in the DHS report that 3824 children were tested?

Secondly, why can't I get the parents' education level of children under 59 months from the PR file?
